DUSKO PRALICA

QA ENGINEER

PROFILE

Hi, I`m a QA Engineer with more than a year of experience in testing. In everyday work, I use tools like Jira as a management tool to track my tickets. Also, I use Azure Test Plans for writing TS and TC and Pipeline a bit for ci/cd. For API testing I use Postman and Swagger. I usually do manual testing, and when I'm doing it I like to go explore as much as I can with the app. When it comes to automation, I do some simple automation tests using Selenium combined with Java.

SKILLS

- Excellent knowledge of Test Cases and Bug Report writing
- Excellent knowledge of SDLC
- Excellent knowledge of Agile Methodologies
- Good knowledge of HTML and CSS
- Basic knowledge of Java
- Good knowledge of git and GitHub
- Basic knowledge of SQL
